

# Help every child find great books to read!

“Find a Book” is a fun and easy way to select books based on a child’s Lexile measure and interests. You can use this free search tool to build custom lists for readers at all ability levels, and then locate your selections at the local public library.

## 1. Go to [www.Lexile.com/fab/SD](http://www.Lexile.com/fab/SD)

Here you can enter a student’s Lexile measure to find books and articles that are at the appropriate skill level.

## 2. Enter your child’s Lexile measure

If you do not know your child’s Lexile measure, you can search for books based on his or her comfort with grade-level materials.

## 3. Have your child pick interest categories

## 4. Create your child’s reading list

You can browse books to view and refine the search results by adding titles to your child’s reading list.

## 5. Visit your local library

You can print or email your child’s custom book list, so you’ll have it with you when you go to the library. The librarian can help you determine which items from the list are available in your community, and can look for book that could be borrowed from other libraries around the area.

*Please note: A Lexile measure is a measure of text complexity only. It does not address the subject matter or text quality, age-appropriateness of the content or a reader’s interests. The Lexile measure is one piece of information that you can use when selecting books.*
